ERP integrations: why, and is it done

Status as of Fri 6 Nov 2026

#	Integration	Provider	Why we want it	Done?
1	Email sending	Resend	Send invoices, alerts and approval notices	Built, lightly tested, not released
2	Daily exchange rates	A public rates API (provider to be confirmed)	Prices and reports in more than one currency	Built, lightly tested, not released
3	Slack and Teams alerts	Slack and Microsoft Teams webhooks	Put stock and approval alerts where the team already works	Built, lightly tested, not released
4	Telegram bot	Telegram Bot API	Alerts, and approve or reject by reply, without a business account	Not done: next in line
5	SMS	Twilio, plus an Egypt provider (to be confirmed)	Text alerts to people without a smartphone app	Not done: next in line (one-way only in Egypt)
6	Google Sheets and Drive	Google Sheets and Drive API	Export reports to the tools people already use	Not done: next in line
7	AI model	OpenAI	Ask the system questions and search stock in plain language	Not done: needs a provider and budget
8	Speech to text and text to speech	OpenAI Whisper, ElevenLabs	The base for voice approvals	Not done: after the AI model
9	WhatsApp approvals	Meta WhatsApp Cloud API	Approve, reject and chase by WhatsApp. Our main difference from other ERPs	Built earlier, never tested on a real phone: needs a Meta business account
10	Payment gateways	Paymob, Fawry, Kashier, PayTabs, Tap	Take card and wallet payments and match them to invoices	Not done: each needs its own provider account
11	Couriers	Bosta, Aramex, Mylerz	Shipping labels and delivery status	Not done: each needs its own provider account
12	Online stores	Shopify, WooCommerce, Salla, Zid	Keep stock in step with an online shop	Not done: after the core is stable
13	Voice calls	Twilio Voice or SIP (to be confirmed)	Approve and check stock by phone	Not done: needs AI, speech and a phone provider
14	Egypt tax e-invoicing	Egyptian Tax Authority (ETA)	Required for Egyptian businesses to invoice legally	Built and tested on the authority's samples. Not sent: needs their test access and a signing method
15	Saudi and UAE e-invoicing	ZATCA (Saudi) and the UAE system	Same requirement in the Gulf	Not done: after Egypt
16	Bank feeds	None: Egypt has no official open-banking service	Match bank lines to payments automatically	Not done: Egypt has no official open-banking service
